List of Figures

1 Rationale and Research Questions

Research question: How does air quality in various Ukrainian cities differ before and after the Ukraine-Russia dispute?
******* Rationale: On February 24, 2022, Russia attacked Ukraine. The first city attacked was Lviv and Dnipro. Kyiv was hit February 24th.

2 Dataset Information

Describe sources of data here (input Julia paragraph)

Explain data wrangling process here (shirley do this)

Data File Name	Description
UkraineData	(Raw) Ukraine air quality data
Ukraine_Processed	(Processed) Ukraine air quality data, w/o na's
Dnipro_2021	Dnipro PM2.5 + PM10, Mar 2021
Dnipro_2022	Dnipro PM2.5+ PM10, Mar 2022
Lviv_2021	Lviv PM 2.5 + PM10, Mar 2021
Lviv_2022	Lviv PM 2.5 + PM10, Mar 2022
FULL_DNIPRO	Lviv_2021 + Lviv_2022 combined
FULL_LVIV	Dnipro_2021 + Dnipro_2022 combined

3 Exploratory Analysis

```
#I'm confused if we need to upload a shapefile of ukraine so that we can make a map bu

#https://simplemaps.com/data/ua-cities
#we can download a csv of all the cities with lat and long from this link and we could
```

Table 2: PM2.5 Levels by City

City	Mean	Min	Max	Std Dev
Dnipro	49.41546	4	160	25.91608
Lviv	60.51086	8	518	34.79405

Table 3: PM10 Levels by City

City	Mean	Min	Max	Std Dev
Dnipro	24.73309	2	120	15.82186
Lviv	30.29246	4	606	26.78330

```
# DNIPRO PM2.5

#group=as.Date(year(Dnipro_2021$date)), color =as.Date(year(Dnipro_2021$date)))
#aes(month(date, label = TRUE, abbr = TRUE))

PM25_Dnipro_PLOT <-

  labs(x = "Date", y= "PM10",
       title = "Observing PM10 Values in 2022 Lviv and Dnipro Ukraine")
print(PM10_Lviv_and_Dnipro_PLOT)
```

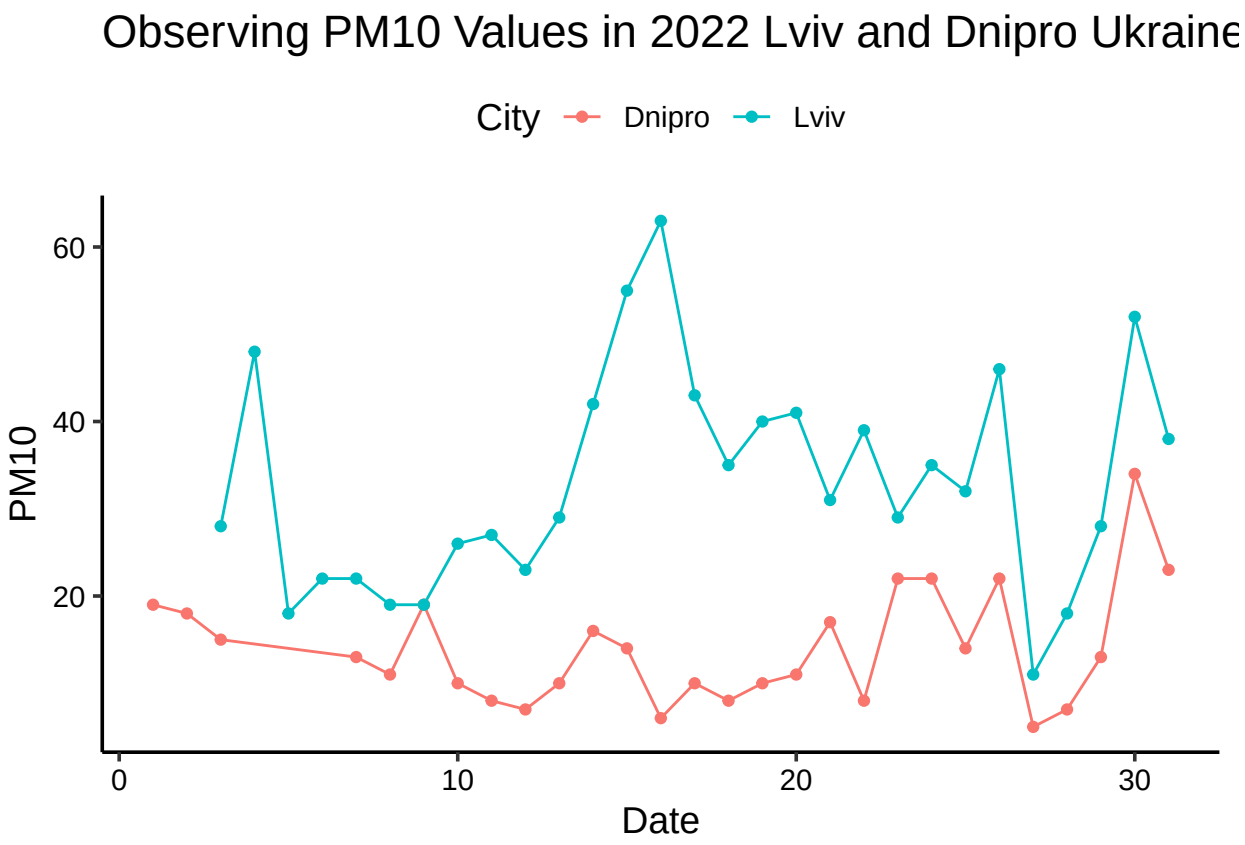

Figure 6: Comparing Air Pollution in Lviv vs Dnipro

4 Analysis

4.1 Question 1: Are there significant differences in air quality levels between affected Ukrainian cities during the Russian invasion?

[insert text about how we analyzed]

4.2 Question 2: Do air quality levels worsen in affected cities around missile attack events?

[insert text about how we analyzed]

4.3 Question 3: Are there significant differences in air quality levels in affected Ukrainian cities before and during the Russian attacks?

[insert text about how we analyzed]
